

ACKNOWLEDGEMENTS, RESOURCES & CREDITS

Wikipedia proved invaluable in my research while writing the **Collective Obsessions Saga**. Blending true facts with fiction is a habit of mine, adding miscellaneous tidbits here and there which may seem casual but are actually carefully crafted.

And much thanks to *Fam-Tree* software. Without it, I wouldn't have been able to create the *Larkin-Sullivan Family Tree*. The software, along with a text spreadsheet, helped me organize and keep consistent technical relationships between fictional characters through the generations, along with images, historical notations, birthdates, marriage and divorce dates, death dates and other pertinent information. The most handy tool in the software was the "find relationship with" feature, which allowed me to click on one name in the family tree and find his/her relationship with any other name on the list in an instant.

I also drew from many other online resources, as well as print-books and a variety of professional consultants. Thank you all!
